Employment opportunity

Reference: LIH001

Date: October 20, 2011

Title: Senior Research Scientist

Description:

Research and develop nutraceutical ingredients formulation and manufacturing technology;
Test and evaluate raw materials, intermediates and finished products of nutritional supplement ingredients by lipid oxidation analysis, gel electrophoresis, texture analysis, etc.;
Develop and validate analytical methods and protocols, including HPLC/UPLC, GC-FID, and SPME (solid phase micro extraction);
Provide technical support for manufacturing productions, safety and sanitary regulations, and waste management;
Create production specifications, SOPs, and certificate of analysis.

Requirements:

Interested candidates should have the following background, skills and qualifications for consideration:

- Master's Degree in Food Science, Chemistry, or Biology
- Skills and knowledge of Formulation, Lipid oxidation, Gel Electrophoresis, GC-FID, SPME and texture analysis

Background:

Pharmline Inc is a manufacturer, processor and supplier of ingredients used in the food, beverage and nutritional industries. The company has 100,000 square feet facility in Florida, New York, which is located approximately 55 miles northwest of the New York City. The company has approximately 100 employees and offers a complete benefits package including a 401K plan with employer matching contributions. Pharmline Inc is a division of Gadot Biochemical Industries.
