

Nissim Guigui MSc.

Nissim Guigui: R&D and Quality Assurance Manager in Gadot Biochemical Industries Ltd.

He is a graduate of the Tel-Aviv University in the faculty of life sciences: B.Sc (1979) in Biology and M.Sc (1983) from the Department of Microbiology in which he works also as a teaching assistant.

Highly experienced in fermentation processes and in the field of immobilized microbial cells, from lab scale via scale up in pilot plant to full industrial production.

His expertise covers besides the biotechnological unit of operation (i.e fermentor or immobilized microbial cells column) also a variety of downstream processing methods.

Within the framework of his work he also direct students for biotechnology engineering in their final research project before graduation.

Listed as an inventor in two international patent applications dealing with innovative formulations aimed to overcome problems in application of Calcium enrichment in certain food products.

Familiar with the regulations and standards governing the food industry like ISO-9001:2000, HACCP and GMP.
